

Dear sir/madam,

As a over 2 year subscriber and listener of XM Satellite radio I would like to express my concerns over the NAB's petition 04-160. I personally find XM radio to be the next step in the evolution of broadcast radio and the NAB should not be allowed to block this technological evolution. Specifically, the traffic/weather channels provided today by XM Radio gives me a convenience and service unlike anything before. As I am driving from various cities covered by XM's traffic/weather channels I am guaranteed quick and easy access to the local conditions without the need to fumble around the radio dial.

I pay for XM Radio and XM radio should be allowed to provide the services the people want. I respectfully urge the FCC to reject the NAB's petition 04-160.

Regards,  
Michael Eng
